

Pace Brantley is a 1 to 1 iPad school. All students are required to have and bring to school a full-size iPad (not mini) that meets the following requirements:

iPad Model-Minimum Requirement: iPads must be able to run the most recent iOS and have a screen of at least 10.9 inches.

****A protective case is mandatory,** and a tempered glass screen protector is strongly recommended. **

Insurance

Student iPads are insured by the school through Worth Ave. Group. Parents are required to provide all information requested for iPads to be insured. Our insurance policy is updated quarterly, so new devices can be added later. Any iPad that is uninsured will not be eligible for repair through the school. Students whose iPads are sent out for repair by the school will be given a Pace Brantley owned iPad for school use until their device is returned. Students that have uninsured iPads will not be eligible for a loaner iPad and the family will be responsible for providing a working device for the student. *Two iPad repairs per school year are provided at no cost to the parents/guardians. Subsequent repairs will result in a maintenance fee of \$100.00 per incident.

iPad Management

As part of your child's acceptance to Pace Brantley Preparatory School, we require the following information regarding all iPads that will be used by your child on campus. The Apple ID password will be used by Pace Brantley to install apps required by your child's teacher. Necessary apps that require payment are provided by Pace Brantley at no charge to you or your Apple account, but the password is required for installation.

Please input the iPad information directly to your enrollment application through the FACTS website.

Notability

Students are required to use the Notability app for the majority of their classes. This app has a subscription fee of \$14.99/ year (as of 5/24). Pace Brantley will provide the first year for students at no cost. Subsequent years must be paid for by the family.

VPN

All student iPads are monitored by teachers and staff via Apple Classroom. Students are not permitted to use a VPN while on campus as it inhibits the use of Apple Classroom. VPNs must be able to be disconnected while students are on campus.
